## Polish Pro

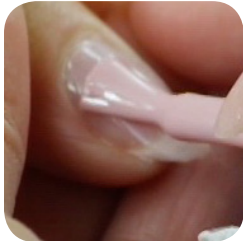

LED/UV Gel Polish

### OMBRE GLITTER NAILS

#### STEP 1:

Prep the natural nail. Apply an even layer of **Polish Pro Base Coat Plus** to all five fingers. Be sure to cap the edges. Cure in any full hand UV lamp for 2 minutes, or any LED lamp for 30 seconds.

#### STEP 2:

Shake the **Polish Pro** color of your choice well before use (**Rose Garden** is shown here). Apply a layer of color. The first layer may look semi-translucent. Cure for 2 minutes in any full hand UV lamp or 30 seconds in an LED lamp. Repeat for full coverage.

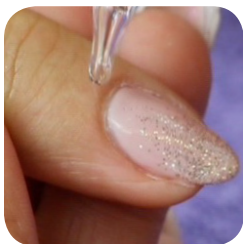

#### STEP 3:

Before removing the tacky layer, coat a clean brush with **Secrets Sparkle**. Starting at the free edge, apply the glitter by gently patting the brush onto the nail. Apply less glitter as you work towards the cuticle, creating an ombre. Stop three quarters of the way up.

#### STEP 4:

Apply one coat of **Polish Pro Top Coat** to entire surface. Cure in LED lamp for 30 seconds or UV Lamp for 90 seconds. If nail still feels coarse from glitter, apply a second coat.

#### STEP 5:

Remove the tacky layer with a **Nail Wipe** saturated with **Cleanse**, and condition the cuticle with **Nurture Oil** for a beautiful Glitter Mani!
