

JUST ONE BOTTLE, WITH FULL CONTROL.

With Rubber Base you can sculpt a full set of nails in just half the time of a traditional gel enhancement - and then soak to remove them in the same amount of time. No pots or jars, just one bottle and full control.

EASY TO LEARN, BEAUTIFUL RESULTS.

Rubber Base is easy to learn and easy to teach to use. Just apply like a gel polish, cure, and its that easy to have beautiful enhancements.

THE PERFECT BASE TIP, STRENGTHEN, SCULPT, CREATE.

Rubber Base is a foundation gel like no other. You can extend and strengthen the natural nail, with the ease of applying gel polish. Once you finish applying rubber base, you have the perfect base for your nail art creations. Paint it with Polish Pro for a polished look or use 3D embellishments to wow a client. The Possibilities Are Endless.

What Will You Create Today?

Opaque Peach

Opaque Peach Pink

15 mL (.5 Fl. Oz.)

Item #: 06940

Opaque Pink

Opaque Dark Rose

15 mL (.5 Fl. Oz.)

Item #: 06942

VISCOSITY & USES

VISCOSITY: Medium/Thick

SKILL LEVEL: Ideal for all levels.

USAGE: Can be used for easy building of the nail, or for a slight apex for some added durability. Because of the added strength, builder gels are ideal to be used for natural nails, tip and overlays, or sculpting and can be soaked off.

THE PERFECT SALON SERVICE

Designed for an extra strong gel polish application and use over natural nails. Perfect for short tip extensions and Short sculpted extensions.

Building a community, one nail at a time.

INSTRUCTIONS

STEP 1:

After proper nail prep and form application, apply **Essential Bond** to the natural nail. Remove the brush from the bottle and wipe along the edge of the bottle, then brush onto the natural nails. Allow to dry for one minute. They will not appear chalky white.

STEP 2:

Open your **Rubber Base** (choice of colour) and brush down the gel onto the nail plate as if it were a gel polish. Place the gel near the cuticle line, allowing room for your margin, and pull product forward towards the free edge. Be sure to cover the body of the nail with a thin even coverage of the gel. Cure in the **Dual Cure Lamp**, LED for 60 seconds or UV for 2 minutes.

STEP 3:

Do not remove the tacky dispersion layer. Apply a second thin coat of **Rubber Base** (choice of colour). Be sure to cover the body of the enhancement with a thin even coverage of the gel. Cure in the **Dual Cure Lamp**, LED for 60 seconds or UV for 2 minutes.

STEP 4:

Do not remove the tacky dispersion layer. Check the nail from all angles to ensure proper apex placement. To reinforce the structure of the enhancement, you will need to apply a small amount of **Rubber Base** (choice of colour) to the upper arch. Cure in the **Dual Cure Lamp**, LED for 60 seconds or UV for 2 minutes. Use a **Nail Wipe** saturated with **Cleanse** to remove the tacky dispersion layer.

STEP 5:

Refine file using your **Endurance 180/240 Grit Buffer**. Check for proper design and apex placement. File the nail so it is smooth, balanced and attractive following the curvature of the nail. Remove excess dust with your **Plush Brush**. Use a **Nail Wipe** saturated with **Cleanse** to remove any dust that may be hiding in the side walls.

ADD YOUR DESIGNS:

Now that you have your Rubber Base structure built, its time to add a design!

A Polished Look: Apply **Polish Pro Gel Polish**, or the NEW! Tack-Free **Tech-Gel Colour Gels**.

Looking for Some Sparkle? Mix up a custom glitter gel with the **Tech-Gel Glitter Base**.

Just Go Nude, apply **Glaze 'N Go LED** for a pretty nude nail look.

FINISHING THE NAIL:

Apply **Glaze 'n Go LED** or **Essential Seal** and cure in the **Dual Cure Lamp**, LED for 30 seconds or UV for 2 minutes. Wipe off the tacky dispersion layer using a **Nail Wipe** saturated with **Cleanse**. Condition the cuticle and surrounding skin with **Nurture Oil**.
